

## Reflection on Cairns Study Tour 2016

Written by Lam Yun Kei Susie

Ding dong...ding dong...it's twelve o'clock at midnight, Cinderella has to take off her glass slippers and go back to reality. But Cinderella gained an unforgettable memory with her prince -- Cairns. She learnt lots of things.

First, she started to converse with strangers such as the international students in the college, the host family, etc. During the visit to the nature parks and farms, she learnt different species of trees and animals that could only be found in the rainforest in Cairns. Besides, she was impressed by how the Australian government put effort in protecting their beautiful natural environment. Cinderella really enjoyed her journey and felt so grateful that she had such chance to see Cairns.

Moreover, she enjoys the Australian lifestyle which is stress-free and peaceful. The pace of life is much slower than in Hong Kong. And she appreciates the green environment around. The air is extremely clean! The sky is so clear that hundreds of stars were found smiling every night. Thank God for this! Although the trip is short, she has accumulated her knowledge of another place on the earth. She got good relationships with her host family and friends. She became brave to speak in English with anybody she met. She got the awareness of being environmentally-friendly and she is ready to start her new life now. She will wait for the next chance to meet her prince again in the future!
