

Reflection on Cairns Study Tour 2016  
Written by Zhou Yangdan Denna

I am Denna from 5A. First, I would like to thank Principal Cheung and teachers for giving me the chance to participate in this exchange tour.

I enjoyed this tour very much. I have learned lots of things through this tour. For example, I knew more about the Australian culture. I have found that Australians are very nice, friendly and active. They always say "hello" to others although they do not really know each other. This is very different from Hong Kong. Not many Hong Kong people would be passionate and enthusiastic to others.

In Cairns, houses are not high but big because of its low population. Hong Kong's buildings are very high and every unit is so tiny because of the high population which causes a big demand for houses. Houses in Australia are so spacious while cramped in Hong Kong.

Cairns is a beautiful place. There are lots of mountains, gardens and trees all around. Many farms are found here too. The environment in Cairns is exquisite. Not much noise is heard all day, the environment is peaceful and relaxing. But in Hong Kong, the streets are busy so we can hear the noise of the traffic coming and going. Therefore, I enjoyed walking on foot when I was in Cairns because the environment makes me feel relaxed.

Last but not least, my English has improved a lot after the tour. I was afraid to speak English before. As I spoke a lot with my host family and other students so I have become more confident in speaking English.

To conclude, I learned many things in this tour. I will share my experiences with my classmates. This is a precious and impressive experience in my life. I will remember it forever!
